

We are going to speak to Kylie today! She is a former previous sleeve patient and she is going to tell us about her experience! Hi Kylie!

R: Ola! I was sleeved in 2011 November. I went to Juarez Mexico and I met Doctor Rodriguez and Dr .Amole. And I found be light weight on the internet. And I researched both doctors and I could not find one negative comment about either of them. That was enough to convince me that they were the right choice for me.

When I met them they put me totally at ease. They were wonderful. The hospital is amazing in Juarez. It is, and all I can say is it is clean clean, clean. The care is top notch. I am here today in Tijuana Mexico.

My girlfriend Sara had done the sleeve two days ago. She got hers done yesterday sorry! We are in Tijuana at the INT hospital. And it's awesome. And DR.Jose and Dr. Amole did her surgery, and between the two the Tijuana is a little laid back as far as hospitals go but still clean clean clean. All I can say is how comfortable and everybody else! And how clean everything is and how nice everybody is! The wonderful people.

They don't know English they still say,"how do you do and try and talk to you!" hugs! And it's just a wonderful thing! I am 18 months out now and 17 months old and I have lost a 107 pounds! I have gone from a size 26 to a size 14! And I am still losing so! I am very happy with the sleeve! My quality of life was doing the lean and what made me do it was i was going up the stairs one day and I was on the phone with my sister Don in Minnesota and she had asked me if I was exercising! And I was huffing and puffing so hard that I just could hardly get up the stairs anymore and I thought about it and made a choice to do this for myself and have a better life for myself. I don't think my kids were ever embarrassed of me but now I know they are much happier for me. They feel much more confident and they know that I am not going to get diabetes and any heart disease. No more high blood pressure or anything like that. So it was so worth the money and I got to say Doctor Amole and Dr. Rodriguez and be light weight without them I would still be a size 26 probably bigger .You know I was 299 pounds. I was one pound away from being 300 pounds. And it terrified me.

And I was like I got to have a better life than this. So now I am 192 pounds and I am very proud of that. And that's about it. I am happy.

Just tell me this Kylie; you have been in out of here in Tijuana. So are you comfortable walking around getting something to eat?

Everybody on the street is wonderful! We just saw a gentle man today and his back pack was opened and the girl with me was like! Your pouch is open and she was worried and I was like, you don't have to worry! Everyone here is safe and wonderful. The streets are immaculately clean. The garbage is dumped every night. It's just awesome and like said in street vendors their food is so good. I wouldn't mind living here. The weather is so nice. I am from Michigan and we had snow like up to here this year and to come

down here and just be able to walk and everybody is so friendly and so loving. The Mexican people are all about family. They don't care if you are black or white, gay, straight they don't care. They take care of their families and they want you to know parts of their families and it's wonderful. I couldn't say enough. If I ever come down again to get things skrunkened and tightened then it will be in Tijuana. I absolutely trust feel light weight and I love what they have done for my life and for my family and for my girlfriend and I am happy.

Thank you Kylie. We are happy to for you. Kylie will be staying in touch with us because we keep in touch with our good friends who just have got wonderful weight loss stories and that's what we want to share with you. So thank you very much.

R: Thank you very much.
